

Adding Unattached Trees and Lines at Ancestry.com

This is VERY simple to do.

Open up the tree you are working on and want to add a yet unmatchable match tree to.

So, you open a tree, anywhere in that tree, makes absolutely no difference for this purpose. Like this:

John W Chamberline Chamberlin
View relationship to me
Birth 04 Apr 1826 in Madison County, Alabama
Death Apr 1919 in DeSoto County, Mississippi

Parents

- [+ Add Father](#)
- [+ Add Mother](#)

Spouse & Children [v](#)

- Ruth Catherine Robinson** 1831 – 1861 [v](#)
[View Family Group Sheet](#)

Now, if you are starting with a female, add a mother. For a male, add a father.

Add no dates, just the name and then it looks like this:

John W Chamberline Chamberlin
View relationship to me
Birth 04 Apr 1826 in Madison County, Alabama
Death Apr 1919 in DeSoto County, Mississippi

Then you click on what you added and now you get this where you will then click on “Edit this person”:

The screenshot shows the profile page for 'Questionable Jane Match'. At the top left is a placeholder profile picture. To its right is the name 'Questionable Jane Match' and a link 'View relationship to me'. Below the name are fields for 'Birth' and 'Death'. Two buttons are visible: 'Edit this person' (highlighted in yellow) and 'Story View'. Below these are links for 'Search records', 'View family members', and 'More'. A navigation bar contains tabs for 'Overview', 'Facts and Sources', 'Media Gallery', 'Comments', 'Hints', and 'Member Connect'. The main content area is divided into two columns. The left column has sections for 'Media Gallery' (no items added), 'Timeline' (no facts added), and 'Comments' (no comments added). The right column is titled 'Family Members' and includes sections for 'Parents' (with '+ Add Father' and '+ Add Mother' buttons), 'Children of Unknown Spouse' (with '+ Add Spouse' button), and a list of children, including 'John W Chamberline Chamberlin' (1826 - 1919).

In “edit this person” select “Relationships”

Once in the relationship window you will be able to remove anyone they are linked to when you entered them.

The screenshot shows the 'Edit Questionable Jane Match' window with the 'Relationships' tab selected. The window has a title bar with 'Edit Questionable Jane Match' and a 'Delete Questionable Jane Match' button. Below the title bar are tabs for 'Vital Information', 'Facts & Events', 'Relationship Events', 'Relationships', and 'Notes'. The main content area is divided into sections for 'Father', 'Mother', 'Spouse', and 'Children'. Each section has a '+ Add' button. Under the 'Children' section, the name 'John W Chamberline Chamberlin (Born: 1826)' is listed. A red circle highlights a 'Remove' button with an 'x' icon next to the child's name.

You will get a confirmation widow, click ok.

Then go back to the person and they should be free standing attached to no one.

The screenshot shows a profile page for a person named "Questionable Jane Match". At the top left is a placeholder profile picture. To the right of the picture, the name "Questionable Jane Match" is displayed in a large font, followed by the text "View relationship to me". Below the name are the fields "Birth" and "Death". There are two buttons: "Edit this person" and "Story View".

Below the profile information is a navigation bar with icons and text: "Search records", "View her family tree", "View family members", "Print", and "More options".

Underneath is a tabbed interface with tabs for "Overview", "Facts and Sources", "Media Gallery", "Comments", "Hints", and "Member Connect". The "Media Gallery" tab is active, showing a message: "No photos, stories, audio or video have been added yet." with a "+ Add Media" button. The "Timeline" tab is also visible, showing "No facts or events have been added yet." with a "+ Add Fact" button. The "Comments" tab shows "+ Add Comment".

On the right side, there is a "Family Members" section. It has three sub-sections: "Parents" with "+ Add Father" and "+ Add Mother" buttons; "Spouse & Children" with "+ Add Spouse" button; and a "View Family Group Sheet" link at the bottom.

The above works well if you are starting out building a new match tree where you have NO clue where they may eventually fit.

If you have separate trees on ancestry the ONLY way you can merge them is to use software, like Family Tree Maker or whatever it is you are using. The advantage of FTM 2012 or later is you can synch trees you have online and changed in your software.

You would need to download your gedcoms, load them all into a tree software program, if you know there is no link, you select "add without merging" and everything will be in there. All the trees in one file, they do not need to connect yet and as you find the links you manually attach them where they belong.
